

**REMARKS**

Claims 1, 2 and 4-12 are pending in the application, claims 11 and 12 standing withdrawn as being directed to a non-elected invention.

The claims have been amended to distinguish over Walker.

Specifically, claim 1 now recites the engagement feature extending circumferentially about the mounting element and that the point of engagement with the hanger support shifts circumferentially as the mounting element is rotated about the screw to be shifted vertically.

In Walker, the "engagement feature" 56 as identified by the Examiner is keyed to the hanger support and its point of engagement would not shift circumferentially if the mounting element were rotated.

Thus, claim 1 recites structure which differs fundamentally from Walker and is patentable. Likewise, claims 2 and 4-10 dependent thereon are thus respectfully urged to be patentable, and the application now in condition for allowance.

Favorable reconsideration is respectfully requested.

Respectfully submitted,

By:
